H1 2026 Results

Phoenix Financial

August 25, 2026

Disclaimer

This presentation includes information regarding the Company's financial statements results and strategic plan & targets. Accordingly, the presentation includes forward-looking information as defined in section 32A of the Securities Law 1968.

The information regarding the strategic plan & targets update includes, among other things, forecasts, goals, assessments, and various estimates, including information presented by way of illustrations and/or graphs and/or tables relating to future events or matters, the realization of which is uncertain and not under the control of the Company or the companies in the Phoenix group, including, among other things, regarding revenues and profitability from new initiatives and the implementation of various plans, profit forecasts, EBITDA, and other future financial data. The Company's management has carried out a process of updating its strategic goals, based on the Company's data, market data, raw or processed internal information collected, and comparative information, and based on certain working assumptions regarding the Company's activities and relevant markets.

Such information is based on the subjective assessment of the Company and its advisors, and among other things, relies on past experience, the professional knowledge accumulated by the Company, existing information, and current expectations and assessments, including future developments as known to the Company today.

The realization and/or non-realization of forward-looking information which is stated in the financial reports and this presentation will be affected by risk factors that characterize the activities of the Company and group companies, as detailed in the Company's periodic reports, including changes in economic conditions, capital market in Israel and globally, the development of competition in the segments relevant to the group's activities, regulatory changes, changes in consumer preferences and consumption habits, changes in working assumptions or in the economic models and assumptions, and changes in implementation or execution

that can not be estimated in advance and may not be controlled by the Company. Hence, there is no certainty that the actual results and achievements of the Company in the future will be in accordance with these views and may differ, also substantially, from those presented in this presentation.

Furthermore, the presentation includes data and assessments based on external sources, the contents of which were not independently tested by the Company and therefore the Company is not responsible for their accuracy.

This presentation may include information that is presented differently from the way it was presented in the company's official reports, some information may be presented and/or categorized and/or edited and/or segmented differently from the company's official past reports. Certain financial measures presented herein are non-IFRS financial measures, which should not be considered as a substitute for or superior to financial measures calculated in accordance with IFRS.

This presentation should not be seen as an offer to purchase or sell the Company's securities, or an invitation to receive such offers. The presentation was prepared for convenient and concise presentation only, and does not purport to cover all the data about the Company and its activities and/or all the information that may be relevant for making any decision regarding investment in the Company's securities in general. In any case of contradiction and/or inconsistency between the information presented in this presentation and the information in the Company's financial reports and/or its public reports, the information in the financial and other reports shall prevail. This presentation also includes information that the Company has gathered from third parties, where the Company has not independently verified the data. For the avoidance of doubt, the Company does not undertake to update or change the information included in this presentation.

2026 H1 & Q2 | Key Takeaways

1

Continued strong performance, strategic growth, shifting mix

Core income growth: +10% H1 YoY with 1.45 NISb (743 NISm in Q2), above expectations, guidance to be updated

High growth in Asset Management: +36% H1 core income YoY reaching 579 NISm (+48% to 328 NISm in Q2), accelerating shift in mix toward capital-light, fee-based earnings from growth engines

Insurance core income in line with expectations: 873 NISm in H1 (415 NISm in Q2), in line with expectations and market trends in motor; continued strong cash flow generation; significant positive impact expected from stochastic model (+1.2-1.5 NISb CSM, +100 NISm pre-tax income in 2027) and reinsurance costs

2

Phoenix disrupting market

Phoenix platform with organic cross-sale potential: Growing app adoption with **one million** app users (including ~100k securities traders); growing cross-sales; expanding multi-engine, multi-channel capital generation platform

Inorganic growth & building platform capabilities: Launched international P&C reinsurance capability with AA- rating through approximately 150 NISm investment with expected impact in 2027; capturing synergies in recent M&As (e.g., BUYME digital platform, multiple wealth managers); assessing additional opportunities

3

Growing capital returns & payouts

Growing payouts: 62% distribution from H1 earnings of nearly **one billion** NIS (720 NISm dividend, 252 NISm buybacks), including 65% totaling 567 NISm from Q2 (400 NISm dividend, 167 NISm buybacks); 2026 buyback plan increase from 300 to 400 NISm

Strong permanent capital base: 177% Solvency, international credit ratings, balance-sheet optimization supporting acquisitions and capability building / organic growth, expected increase in equity following implementation of stochastic model

H1 2026 | Strong Core Income Growth

Income

Comprehensive, after tax, NISm

Core Income and Core ROE do not include Non-Operating Effects: Investment yields & variable fees above or below normalization (nominal risk-free rate + 2.50%, 2.25% before Q4/25, 3% real yields under IFRS 4), interest rate effects, and special items; for convenience, the statutory tax rate for taxable income for each activity is used, while the difference between the actual tax and the statutory tax is recorded in Special Items; see Glossary for definitions

Capital Allocation | Institutional-Grade Capabilities

Returns – Corporate Account (“Nostro”)

Percent (nominal)

Real Yield	7.1%	5.4%	8.0%	(3.2%)	1.2%	4.3%	6.0%	5.3%	3.9% ¹
Above (below) nominal risk-free rate	7.2%	4.7%	10.6%	1.2%	0.2%	3.6%	4.1%	4.1%	4.0% ²

Asset Allocation - Corporate Account (“Nostro”)

Percent (June 30th, 2026)

Investment performance & track record:

Proactive and proprietary dealflow and sourcing

Team of over 100 investment professionals managing corporate account and client assets

Group plans based on normalized returns³

International investments with leading partners, co-investments, & direct positions

Responsible allocation & risk management:

Mark to market reporting transparency (reporting volatility)³

High liquidity maintained including during market stress

Limited exposure to high-risk categories (e.g., HY private credit, software)

Responsible asset and liability management

¹ Five-year period (2021-25), based on known CPI LTM change as of end of period
² Normalized investment performance for core income based on 3% real yields under IFRS 4 until 2024 and nominal risk-free rate + 2.25% under IFRS 17 starting 2025, increased to 2.50% starting Q4/25
³ Debt assets valued for Israeli institutional investors by external evaluator appointed by the regulator

Growing Payouts & Disciplined Capital Returns

Payouts highlight profitable growth & cash-flow generation

Total payout (dividend + buyback): 62% from H1 earnings – in line with guidance of 55%+ (including 45%+ dividends), facilitated by diverse strong cash flows & remittance, strong financial position including Solvency II, ratings, liquidity

Dividend: 400 NISm dividend announced from Q2 earnings (1.6 NIS/share, 46% of comprehensive income)

Buybacks: 167 NISm executed during Q2 (2026 plan increased from 300 to 400 NISm)

Dividends & Buybacks
From annual income, NISm

From annual income (including paid in following calendar year)

Payout (Dividends + Buyback, from annual income)	30%	35%	39%	49%	51%	62%
Shareholders' equity	9,653	10,145	10,580	11,542	12,496	13,125
Paid during calendar year						
Dividends	580	581	297	535	1,515	680
Dividends per share (NIS)	2.3	2.3	1.2	2.1	6.0	2.9
Dividend yield (annualized) ²	7.1%	5.9%	3.1%	4.6%	6.5%	3.6%

¹ In 2025, 300 NISm buyback plan was executed plus additional 2 NISm from 2024 plan

² Dividend yield calculated based on total dividends distributed in calendar year divided by average market cap at beginning and end of year; figures before 2025 based on IFRS-4 income

Strong Cash Flows | Growing Earning Remittance

Group Cash Remittance from Subsidiaries (FCF)

Announced dividends from income, by business, NISm

Total cash remittance of **1,011** NISm from H1, supporting 972 NISm payouts (720 NISm dividends and 252 NISm buybacks) plus liquidity for organic growth and acquisitions

Glossary

Opportunity | High-Growth Market

Structural tailwinds

Demographics: 2% annual population growth¹

Productivity: 4% annual growth in GDP/capita, driven by tech & defense sectors, including domestic innovators & global leaders²

Wealth accumulation: 7% annual wealth compounding³

Deep resilience: high FX reserves, limited national debt, responsible monetary policy, efficient capital markets

Consumer demand: Growing permanent capital base and retail demand for integrated financial solutions driven by generational shift, globalization, and wealth accumulation across Israeli innovation economy; from deposits & real estate to securities, funds, & alternatives

Growth & value creation in financial services sector

Note: 20215-25 timeframe; 2025 figures based on actual data or estimations based on most recent published data

¹ National Bureau of Statistics (2025)

² Current USD, as of 2024, not PPP adjusted, World Bank

³ Include households and business financial assets managed directly or via institutional investors as of Feb 2026. Source: BOI report

⁴ Include public banks, credit card companies, insurance groups, investment houses and non-bank credit providers; data from TASE. US data taken from disfold.com and includes American top 100 financial companies by market cap as of Dec. 2025; Asset. Management service providers were included in Asset & Insurance Management category

⁵ As of 2024, Source: OECD Financial Indicators Dashboard. 500 NISb is calculated as gap pf 7% out of total 7 NIStr financial assets held by public in Israel

Strategy | Proven Value Creation Roadmap

Attractive business model to capture opportunity

Fee-based financial platform

Recurring earnings from diversified, capital-efficient growth engines & 3m+ clients

Wide moat

Competitive advantages across value chain (e.g., distinctive product development / relationships, ML underwriting, hybrid direct/channel distribution, integrated client platform w/ open architecture, automated service & claims)

Proven growth & performance

21% annual compounding of AUMs, 33% annual growth in core income, industry leading ROE

Strategic drivers of future growth & value creation

1

Compounding organic growth

Momentum from existing businesses while shifting mix to fee-based, capital-light growth engines (20% compounding in asset management)

2

Building out innovative platform to accelerate growth

Increasing cross-sales & deepening competitive advantages from client-focused, data-driven digital/AI innovation for customization, automation, multi-channel distribution, efficiency, agility

3

Inorganic growth

Focus on strategic M&As to accelerate synergies & market disruption, expanding platform capabilities

4

Increasing capital returns

Growing 55%+ distributions (dividends & buybacks), disciplined capital deployment while maintaining strong capital position

Strategy | Growth Guidance & Upside

Guidance to be updated

Core Income Baseline

NISb, before non-operating effects (capital markets, interest rates, & special items)

1

Continuing 10% baseline organic growth: Momentum from existing businesses while shifting mix to fee-based, capital-light growth engines (20% compounding in asset management)

Potential upside beyond guidance

- 2 Early impact of innovative platform:** Increasing cross-sales & deepening competitive advantages from client-focused, data-driven digital/AI innovation for customization, automation, multi-channel distribution, efficiency, agility
- 3 Inorganic growth:** Strategic M&As beyond guidance (including completed acquisitions) accelerating synergies & market disruption, expanding platform capabilities
- 4 Increasing capital returns:** Growing payouts (dividends & buybacks), disciplined capital deployment

Additional catalysts:

Stochastic model to be implemented with positive impact of 100 NISm on pre-tax core income and 1.2-1.5 NISb on CSM**

Investment performance above normalization with net upside of ~300 NISm from difference between 4.0% historic average above nominal risk-free rate vs. 2.5% normalization in core income

Regional developments creating opportunities for partnerships and collaborations

Notes: Investment Policies reported under Insurance (Life Segment) through 2024,
* Core Income & Core ROE do not include Non-Operating Effects: Investment yields & variable fees above or below normalization (3% real yields under IFRS 4 / nominal risk-free rate + 2.50% / 2.25% before Q4/2025), interest rate effects, special items
** Pending regulatory approval, forward looking

Phoenix Platform | Capturing Opportunity

Full solution suite in one place – investments, insurance, financing

Savings & retirement

Investment policies – best-in-class global solutions

Employee stock option administration

Securities trading / brokerage

Insurance - motor / home / travel / pet / health / life

Financing - consumer credit

Untapped cross-sale opportunity

Integrated client platform connecting savings, investments, insurance, and financing
Product and distribution ecosystem experience with AI-driven personalization

Fee-Based Platforms | Compounding AUMs

Assets Under Management

NISb, end of period

AUM does not include additional AUA (assets under administration) including in brokers & advisors, securities brokerage & ESOP platforms

Fee-Based Platforms | Compounding EBITDA

Guidance to be updated

Growth engines include Wealth & Investments, Retirement, Brokers & Advisors, Payments & Financing

Significant FRE (Fee-Related Earnings) & EBITDA

- Mostly low-risk fees & commissions
- In addition, spread income from Financing (adjusted EBITDA includes finance expense & provisions)

Strategy focused on accelerated growth, with strong organic capabilities & proactive acquisitions

903 NISm adjusted EBITDA not including minority interest in H1 2026

Asset Management Adjusted EBITDA

NISm, consolidated including minorities

Deep Dive | Wealth Investments & Retirement

Description:

Investment House (Funds & ETFs, Brokerage, Portfolios, ESOP, W), with current brokerage client base of roughly 100k accounts in 2026; position in “Beta” ETFs (Poland)

Wealth management buildout including Fidelis acquisition

Retirement (Pension & Provident)

Investment Policies

Phoenix Capital Partners

Experienced management / equity partners

Strategy:

Capturing significant market opportunity

Accelerated growth based on market leadership, scale, client focus, and differentiated products / distribution

Building wealth management platforms

Increasing cross-sells

AUM
NISb

Core Income, net

NISm, before non-operating effects

Revenues
NISb

Adjusted EBITDA

NISm, consolidated including minorities

Deep Dive | Brokers & Advisors

Description:

Advisory, benefit administration, retirement planning, & insurance (life, health, P&C, specialties)

Independent brokers providing access to all asset managers / insurance groups; Phoenix distributes across multiple channels

Cash-generative, recurring revenues & capital-light business model, market leader but still low 8% market share¹

Experienced management / equity partners

Consolidating minority positions

Strategy:

Accelerated organic growth based on capabilities, scale, technology, and broad investment solutions

Inorganic growth / rollups of smaller firms onto platform

Streamlining & investing in capabilities, technology, infrastructure, capital efficiency and cross-sell

Revenues NISm

Core Income

NISm, net of tax & minorities, before non-operating effects

Adjusted EBITDA

NISb, consolidated including minorities

Guidance to be updated

Deep Dive | Payments & Financing

Description:

Fee-related Earnings (FRE) including credit card clearing & solutions, SME payments facilitation, BUYME digital gift-card platform with over 1.2 million end users, 15k employer relationships and 1.2k brands and merchants, Holdings in El-al Frequent Flyer Club (increased from 20% to 25%)

Spread-based earnings including SME lending of mostly secured loans, strong cross-sell to existing merchant clients, Construction Finance, Consumer Credit

Strategy:

Accelerating growth across segments, focused on fee-based services and low-risk financing based on capabilities, client relationships, organizational infrastructure, scale, synergies

Growing BUYME digital platform client pool, capturing synergies and increasing effective cross-sell

Broadening credit solutions & financing value propositions across client segments

Improving capital management & infrastructure

Responsible risk management aligned with banking best practices

Revenues
Gross, NISm

Deep Dive | Insurance

Managing performance given cyclical in motor property to capture opportunities and maintain margins
Growth driven by market trends (increasing penetration, demographics) and capturing share in key segments / products
Shifting mix to capital-efficient P&C and selected L&H products
Significant cash flow generation based on strong capitalization / Solvency
Technology driving additional upside from efficiency and competitive advantages (e.g., digitization, automation, AI)

P&C

High growth in market share from 12.2% to 15.2% during 2020-25, balancing margins and growth with advanced pricing engine (e.g., significant increase in number of motor property policies in “Smart” direct platform LTM)

Competitive advantages across value chain in underwriting, distribution, service, claims management with digitization, data & AI

Distinctive hybrid distribution model of direct “Smart” platform and traditional agent channels

P&C GWP (NISb) & Market share (%)

Life & Health

Disciplined growth focused on attractive products

Optimization of business mix, CSM management, capital deployment, financial & operational efficiency, and reduced volatility; management of long-term liabilities with less certain outcomes, reducing overall cost of equity, implementation of stochastic model*

Technology driven performance & efficiency including digitization, automation, data, AI

Evolution of CSM & VNB of Investment Policies NISm

Glossary

Insurance Segment Accounting | Update

Update Highlights

Allocation of capital and net investment income from “Other Equity Returns” segment to business unit segments Life, Health, and P&C

No change to total core income and normalization method

Capital returns are allocated to business segments that use the capital, better reflecting capital needs and impact on segment performance

Investment returns on assets & associated costs are considered part of the economic performance of the operating segments

Allocation ratios to be updated annually based on capital needs

Allocation is consistent with regulatory guidance and IFRS principles

Impact on Previous Periods

Core Income Before Tax by Segment (Proforma)

Financial
Liabilities

Net financial debt exposure includes financial assets & only some of the financial liabilities (see Q2/26 Financial Statements – Section 4.4 in the BOD Report); Liabilities include use of derivatives opposite relevant financial assets for operational purposes (e.g., Insurance, Investment House) and Gama financing for credit portfolio and improved capital structure; * For more details, see 2025 Financial Reports (Note 6)

¹ Phoenix Financial, Insurance, and Gama rated by 2 rating companies (Maalot & Midrug)

² 335 NISm relates to seed investments

Capital Management & Solvency

Solvency ratio (Insurance Co.)

Solvency II implementation (Insurance Co.)

Solvency II implemented in Israel in line with international standards, with strong regulatory oversight

Transitional measures through 2032, with natural offset from Phoenix backbook runoff (expected to release Solvency capital requirements and risk margin at least as high as transitional measures through 2032, reflecting the difference between Solvency ratio with and without transitional measures)

Standard model used (internal models not allowed)

Phoenix Solvency does not include group equity outside Insurance Company; significant additional group capital resources held under Phoenix Financial (formerly Phoenix Holdings)

Quarterly publication of Solvency ratio with one quarter delay; full breakdown for Q2 and Q4, with only transitional headline figure for Q1 and Q3

Changes in Solvency Ratio

177% with transitional measures estimated as of March 2026 (Including 300 NISm dividend distributed during Q2/2026 & dividend and dividend in kind of 360 NISm announced)

Implementing stochastic model (in progress), expected to have material positive impact on CSM and ~12% increase in Solvency¹

Insurance Company BOD dividend threshold raised to **125%** without transitionals as of the results for June 30, 2026

Cashflow and Liquidity (Phoenix Financial – group level)

Insurance subsidiary dividend payout 40-60% of comprehensive income, in line with solvency target range

Asset Management generates significant cash from fee-based earnings (e.g., investments, brokers, payment)

Strong liquidity at Phoenix Financial level including Phoenix Insurance Tier-1 capital notes of 1.3 NISb (trading on Tel-Bond 40 index) & 1%-5% net debt LTV

Insurance Company with international ratings (Moody's A3, S&P A-) and AAA local rating; Phoenix Financial with international ratings (S&P BBB, Moody's A2) and AA local rating

Accounting Income

Dynamic management of market exposures

Increase of Tier-1 capital in Q2/26

¹ Pending regulatory approval, forward looking

Agenda

Highlights

Financial Results

Segment Breakdown

Appendix

Glossary

P&C

On track toward guidance with opportunities to take additional share

Motor property impacted by market trends, cushioned by competitive advantages in pricing and underwriting, significant increase in number of policies in “Smart” direct platform LTM

Improved technology capabilities across value chain including proven machine learning optimization in motor underwriting & improved automation & performance in claims management (improving loss ratio); implementing AI across activities

Pheonix Insurance started to purchase reinsurance from the sponsored international reinsurance facility (AA-) in July 2026, cost improvement expected from competitive pricing terms in 2027

Reinsurance results in 2025 reflect impact of one-time claim

Comprehensive Income Before Tax

Glossary

Value Creation | Highlights

1	Significant opportunity in growing market	Phoenix provides scaled institutional access to Israel's innovative tech-driven economy with long-term structural tailwinds including demographics, productivity, rapid wealth accumulation, and shifting capital flows to more sophisticated investment and savings solutions
2	Attractive fee-based platform business model	Phoenix is the leading financial platform and asset manager in Israel with \$220 billion AUM and over 3 million clients / 1 million app users; Phoenix runs an institutional-grade capital generation and allocation platform with diversified, capital-efficient, recurring fee-based asset management growth engines (including wealth & investments, brokers & advisors, payments & financing) together with cash-generating multi-line insurance; open architecture linking best-in-class solutions with digital and personal advisory distribution channels
3	Proven performance, growth and profitability	Phoenix's proven value creation strategy focuses on growing fee-generating activities while optimizing recurring earnings mix, building out the integrated savings-to-investment platform, acquisitions, and disciplined capital deployment Phoenix is compounded AUMs with 20% CAGR generating organic & inorganic growth track records, strong capitalization and returns
4	Wide moat across the value chain	Distinctive market leading competitive advantages including integrated client platform, data infrastructure, AI / ML across value-chain (underwriting, distribution, management, servicing, claims), connected hybrid digital and advisory distribution ecosystem, differentiated origination and capital deployment in Israel and globally
5	Strong future organic and inorganic growth	2028 baseline guidance highlights 10% annual baseline organic core income growth with 20% annual growth in fee-generating platforms with strong client focus and cross-sell and 5% annual growth in insurance earnings with disciplined shift toward high-ROE P&C activities, portfolio optimization, and operational efficiency Upside potential from impact of full innovative platform (cross-sales and client-focused innovation), strategic M&As (completed and future), and increasing capital returns
6	Growing payouts based on strong capital position	Disciplined capital returns with growing dividends (5-6% average yield 2021-25) based on 55% payouts in dividends & buybacks, supported by long-term compounding, strong cash remittance across the platform, and permanent capital base flexibility with international ratings, high solvency, strong liquidity
